

Software Features

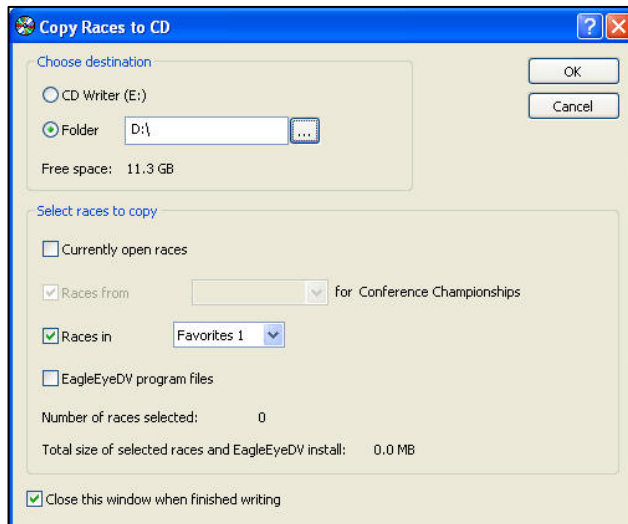

Eagle Eye

Burn video, files or documents to a CD

Keeping the defaulted C:\Videos folder from filling up your hard drive is important. The best way to avoid this is to burn race video to CD for storage after each competition. You can do this one of two ways

Method 1 -- Using Eagle Eye software

Click open the **Copy Race Video CD** icon located on the top toolbar and select your preferred options.

Method 2 - Standard

You can burn race video **just as you would any other file**. Go to My Computer and locate your video file in the Videos folder on your C drive (**C:\Videos**).
