

Software Features

Eagle Eye

Enhancing the finish line

Using the editing features allows you to enhance the finish line by creating a colored line on top of the tracks finish line.

1. Activate the DRAW LINE

Left click the DRAW-LINE icon on the left toolbar to activate this feature.

2. Draw Vertical Line

Place cursor on the screen and perform a **LEFT CLICK to activate** the feature. Move the line up or down as needed. **LEFT CLICK again to de-activate** the feature.

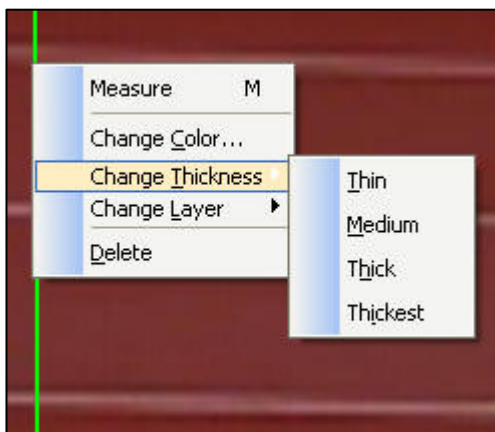

3. Align on the Finish Line

Move the newly created line over the top of the finish line by placing the cursor on top of the line and performing **LEFT CLICK and HOLD** - then **drag line** over the finish line and align at the leading edge of the finish line.

4. Change Attributes

Perform a **RIGHT CLICK with the cursor** on the line to change color, width or other properties.

Tip: clicking the black X on the left toolbar will erase all editing features from the screen.
